

## **Business policy**

### **Including environment and work environment.**

KAMIC Installation AB identifies market needs and together with customers and suppliers we develop competitive solutions and ensure that ecologically sustainable development is promoted.

#### **We do this by:**

- keeping us updated on applicable laws and regulations and that they are complied with.
- having knowledge of our stakeholders' requirements and expectations and to satisfy their needs better than our competitors so that our customers always have full confidence in us.
- to have a communication with all stakeholders with the aim of always being well informed about relevant environmental conditions.
- to ensure a good working environment at our workplaces.
- that every transaction completed is a recommendation for future contacts.

Our work provides the basis for continuous improvement in accordance with the business's documented objectives and plans within both quality, environment and the work environment area.

**Approved by KAMIC Installations management.**

**Karlstad on September 2, 2022.**
